

# Warm It Up (With Love)

Brandy

Warm it up with love [6x]  
Said we gotta warm this up with love

Only bout a day left till the world falls apart  
Wishin' we could press restart, feeling like it's time for change  
Gotta be a reason why we loose our minds,  
everyone's wrong but everyones right.  
Tell me why we make it, so complicated, what are we gonna do

Can't let go when I fall  
Can't hang up, over call, when we feel so alone  
Everyone's watching me  
And I pray when you bleed, I love when you love, I cry when you cry

That's the reason why I'm turning up this song for freedom  
It was up to believe it, cause the whole world is freezing  
Need to warm it up with love  
I've got so many reasons for the thruth that I'm speaking  
And the hope we can see, we need to warm it up with love

Warm it up with love [7x]  
Said we got to warm it up with love

Running out of time and the game clock is winding down  
Tell me how we turn that ground, searching through the lost and found  
looking for hope  
What if we wake and the sun don't shine no more  
Everybody locks that door  
Tell me why we make it, so complicated  
What are we gonna do

That's the reason why I'm turning up this song for freedom  
It was up to believe it, cause the whole world is freezing  
Need to warm it up with love  
I've got so many reasons for the thruth that I'm speaking  
And the hope we can see, we need to warm it up with love

Warm it up with love [7x]  
Said we got to warm it up with love

[Bridge:]  
It's like the pendant is broken, class act this place I'm hopin'  
We make it out alive, downside its looking better  
I need some help, I want it, strong enough to do this for me  
There's nobody here but us

And that's why I'm turning up this song for freedom  
It was up to believe it, cause the whole world is freezing  
Need to warm it up with love  
I've got so many reasons for the thruth that I'm speaking  
And the hope we can see, we need to warm it up with love

Warm it up with love [7x]  
Said we got to warm this up with love
