

What a Change

Bread

You could be the answer to my lonely dream
It's my only dream
Dream it every night
It's about a girl who makes the waters still
Takes my troubled mind
And makes it all seem right

Oh what a change, what a change that would be
I can feel it comin' over me,
Maybe it's strange, strange to say
But I can't remember how
How it used to be.

You could be the answer or another dream
Just another dream
How will I know
I'm afraid to wake up now and face the day
Comes the light of day
She'll have to go or stay

Oh what a change, what a change that would be
Just to wake and find you still here,
'Cause every time, time before
When I open up my eyes
You always disappear.

We could sit and hope that you'll be seen
We could talk about the world and in between,
And when the morning light was through
Then I could see if it was really you.
