Collide

Breathe Carolina

Trust me, they'll be blood in the streets
If you came looking for gold you won't like what you see
Move on, you know nothing's for free
Welcome to the city of ghosts, these vultures never sleep

Your camp is burning down
The sun's never coming up
The voices are all around

And then they all fade out
Are you, and I don't hear a sound

When it all comes falling
And the nightmare's calling
We can be the last ones standing
I'll keep you safe when worlds collide
I'll keep you safe when worlds collide

Trust me, you'll be out here alone
I'm the furthest thing from heaven but the closest to home
Come on, this time you follow me
Right back to the city of ghosts, put the vultures to sleep

Your camp is burning down
The sun's never coming up
The voices are all around

When it all comes falling
And the nightmare's calling
We can be the last ones standing
I'll keep you safe when worlds collide
I'll keep you safe when worlds collide
I'll keep you safe when worlds collide

You see the eyes circling around
You know you're weak when you're alone
I'm the only one between you and the grid
You'll be there soon, I get to be a long way
Here and they all fade out, I'm there
You won't even hear a sound

When it all comes falling
And the nightmare's calling
We can be the last ones standing
I'll keep you safe when worlds collide
I'll keep you safe when worlds collide
I'll keep you safe when worlds collide
