

# Motion

BRELAND

We used to stay out til the sun comes up  
Bedsheets in the back of my truck  
Not knowing  
Where it was going  
We had nothing it was only love  
Least that's what we thought it was  
All the passion  
Baby what happened

Can we go back there  
Back where  
You cared  
Enough to not let go  
I remember when We were  
Always Saying three words  
But now they're an echo

Lately  
We just going through the motions  
Without the emotion  
Threw our love in the ocean  
We just going through the motions  
We just going through the

Same backroads that we been before  
Both closed off but haven't closed that door  
What's the point in going back and forth  
Like the waves cause we still ain't sure  
When you know you know and we still don't know  
Only one ever met my folks  
I was thinking left hand, first dance, girl

Can we get back there  
Back where  
You cared  
Enough to not let go  
I remember We were  
Always Saying three words  
But now they're an echo

Lately  
We just going through the motions  
Without the emotion  
Threw our love in the ocean  
We just going through the motions  
We just going through the  
Without the emotions  
Threw our love in the ocean  
We just going through the motions  
We just going through the motions
