

NO FEAR / HORSE

Bren Joy

Suggest you hold your breath
It gets high in my atmosphere
I didn't need no next
But you look good and you volunteered
Come up for air
I know
Been in your peripheral
Love from me's medicinal

You cannot deny
All eyes are on me
I see inside their minds
But you're all that I need
The ways you never fazed by them
Next to me you got the best seat
It's the fact you with the prettiest piece

So if you want me show no fear with the placement of your hands
When the room's in my command
Can you feel this heat right here?
Only tease 'em 'cause I can
The attention I demand

I prefer it when we're naked for transparency
If the world was ending you know your heaven's with me
All the ways you use your body is a felony
So sickly sweet

I know
Check ups gon' get physical
Lights on for the visual
Let's not make this difficult

Want me show no fear
With the placement of your hands
When the room's in my command
Can you feel this heat right here
Only tease 'em 'cause I can
The attention I demand
