

# Nothing For Granted

Brendan James

Nothing For Granted  
By Brendan James

Leave your worries, leave your fears  
Leave the doubt you're holding dear  
Leave them there, love, by the door  
They're no good anymore

Tell your friends you'll see them later  
Tell your family they can wait  
Oh, only young once, only dream of  
the day that love will steal you away

So run with me down these midnight streets  
We will take nothing for granted  
Nothing for granted  
Come with me, life is short and sweet  
We will take nothing for granted  
Nothing for granted

Stop the seasons drifting by  
Stop believing there's no time  
Stop your heart from closing off  
I think you deserve it all

Love your future, love your past  
Love your body, it's all you have  
Love your secrets bottled up  
But love them more when you give them up

And run with me down these midnight streets  
We will take nothing for granted  
Nothing for granted  
Come with me life is short and sweet  
We will take nothing for granted  
Nothing for granted

Gotta get out of your mind  
There's so many wonders to find  
So many words they could write across your early grave  
So come on and open your eyes  
I will be right by your side  
You will see love lies in everything

Run with me down these midnight streets  
We will take nothing for granted  
Nothing for granted  
Nothing for granted  
Nothing for granted  
Come with me life is short and sweet  
Oh, nothing for granted  
Nothing for granted
