

In the Garden

Brett Dennen

Ah yeah

I'm gonna plant this love in the ground
And watch it grow watch it grow all around me
Gonna plant this love that I have for you
It's all for you
I will nurture it with my own green thumb
And all the flowers will know you long before you come

Ah yeah

In the garden I'll be with you
In the garden I will be true
Love is growing in the garden
Love is growing

Gonna plant this love in the ground
And watch it grow watch it grow all around
Enough love to feed this town
I'll be working till the sun goes down
All I need is patience, I know you will arrive
And when you do you'll feel like springtime
Bop bop

Oh yeah

In the garden I'll be with you
In the garden I will be true
Love is growing in the garden
Love is growing
Love is growing in the garden
Love is growing

Gonna plant this love in the ground
Gonna plant this love that I have for you
And I will nurture it with my own green thumb
And all the flowers will know you long before you come
