

Serenity Now

Brett Dennen

Serenity now I'm leavin'
I believe in myself again
It's a beautiful day to embrace the wind
Embrace the wind
I live on a boat I seldom sail
I'm a captain with no crew
A man collecting moments as they come
Is just a fool

Some of my favorite days
They are cloudy and grey
Some of my best friends I never see
They live so far away
I'm living from day to day
I live from day to day

Serenity now I'm reeling
Kiss me now and wish me well
It's a beautiful day to be bored as hell
I'm bored as hell
I met a man on a mango boat
Playing chess inside his head
He never understood a single
Seinfeld reference

Some of my favorite days
They are cloudy and grey
Some of my best friends I never see
They live so far away
I'm living from day to day
I live from day to day

My blue eyes turn to green whenever it rains
And I don't need a reason to complain

Some of my favorite days
They are cloudy and grey
Some of my best friends I never see
They're living so far away
I'm living from day to day
I live from day to day
