

Encore

Encore

If it's a drink or a kiss, whatever it is I want one more
When it's with you
Here at your front door
Don't wanna leave you yet, feels too good to end at your front
door
So what do we do?

We could say goodbye, like we've done before

But I think we need an encore
I think we need an encore

I swore
I wouldn't fall this fast, but here I am and I'm all yours
You give me that look
Mmm, and I'm sure
If you let down your hair and lead me up the stairs, I'll be do
ne for
Yeah baby, I'm done for

And I think we need an encore
I think we need an encore
I think we need an encore
I think we need an encore

The spark in your eye, yeah, it brings me to life
You're the star of the show, so before you go
I want one more
Hey yeah!

I think we need an encore
I think we need an encore
I think we need an encore
I think we need an encore
