

# Made It

Brett Kissel

Two small town kids runnin' wild, flippin' laps, burnin' gas, nothin' better to do

Two lives, of the sides of the tracks  
Fallin' fast, my family wanted nothin' to do with you  
Like a backroad Romeo and Juliet  
Couldn't stop my heart from beatin' outta my chest  
They knew better but we knew best

We might as well have come from different planets  
Yeah, nothin' 'bout us really adds up  
We were pulled together, just like magnets  
When everyone was tryna break us up

Girl, we never should've made it  
I hate to say it but it's true  
Every card was stacked against us  
Didn't think we'd make it through  
But look what fate did  
Showed everybody what we knew  
All along, our love was strong, they couldn't break it  
Yeah, girl, we made it

Yeah, we made it

Nineteen, two jobs, big city, no money, rent due, didn't have a thing  
So, I called a guy, got a gig, made a deal  
Spent every last dime on a diamond ring  
Two crazy kids takin' on the world  
Divin' in the deep end, goin' headfirst  
When everybody said we'd never work

We cried, we fought, and oh my God, we struggled  
But we never gave up or caved in

When we never should've made it  
I hate to say it but it's true  
Every card was stacked against us  
Didn't think we'd make it through  
But look what fate did  
Showed everybody what we knew  
All along, our love was strong, they couldn't break it  
Yeah, girl, we made it

Yeah, we made it

One day, when we're old and gray  
Kids moved away, I can proudly say that  
"I would do it all over again"  
The valleys, the mountains, the highs and the lows  
The hell we survived, now, everyone knows  
Exactly where we stand

When we never should've made it  
I hate to say it but it's true  
Every card was stacked against us  
But somehow we make it through  
Now, look what fate did

Showed everybody what we knew  
All along, our love was strong, they couldn't break it  
Yeah, girl, we made it

Yeah, we made it  
Well, girl, we made it  
Yeah, we made it
