

# Million Miracles

Brian Doerksen

Come explore with me the miracle of life  
The gift of existence  
Our place among the stars impossibly precise  
We're witnesses of wonders

We're surrounded by a million miracles  
All around us living proof  
We're all here because a million miracles  
Came together to make it true

Golden prairies glow in the early morning light  
The world wakes up to harvest  
A sparrow starts her song as she waits to take her flight  
From the trees that give her shelter

We're surrounded by a million miracles  
All around us living proof  
We're all here because a million miracles  
Come together to make it true

Storm clouds sail away, then centre stage above  
The sun's light ignites the promise  
Man and woman meet pledging life-long love  
Generations tumble after

We're surrounded by a million miracles  
All around us living proof  
We're all here because a million miracles  
Miracles, miracles!  
We're still here because a million miracles  
Come together to make it true  
Still come together to see us through!  
Come together!
