

No Weather

Brian Fallon

Have I been to you a stranger?
Have I done you something unkind?
You bring me ruin when I ask for water
Trouble when I ask for rain

And all I wanted from you was no weather
And no dark clouds since I was young
All I needed was slow peaceful rivers
All I felt was poison on my tongue

Now you're after my cold blooded brothers
Did I fall to raise you with stones
Did your mother raise you what Judas or Jesus
Is it cold out there where you are from

And all I wanted from you was no weather
And no dark clouds since I was young
All I needed was slow peaceful rivers
All I felt was poison on my tongue

And someday I will reach me that valley
And someday it will not hurt no more
I will lie down in them still waters
But tonight it is too cold to run

And all I wanted from you was no weather
And no dark clouds since I was young
All I needed was slow peaceful rivers
All I felt was poison on my tongue

And all I wanted from you was no weather
And no dark clouds since I was young
All I needed was slow peaceful rivers
All I felt was poison on my tongue (on my tongue)
