

What Ever Happened

Brian Wilson

As the time goes by
And I wonder why
When I know the day is through

The summer wine
My favorite time
The night that I met you

Somewhere in between
These things I've seen
I have somehow lost my way

The starry nights
The harbor lights
The moon across the bay

What ever happened to my favorite places
Nothing's where it used to be
What ever happened
What's gonna happen to me

When I wake up in the morning
If I see that you're not there

II you're away I'll be OK
I know that you still care

What ever happened to my favorite places
Nothing's where it used to be
What ever happened
What's gonna happen to me

What ever happened to yesterday morning
My dream came true

These memories
The summer breeze
That brings me back to you
