Let's go out and have some fun With our ski mask and hand guns Driving fast cars to the sun We'll be blind but we'll die young We were wild when we were young With our ski mask and hand guns The law means nothing when you're numb I bet those handcuffs weighed a ton Ski mask and hand guns Lived on the edge lived on the run With those ski mask and handguns I never knew love until I met you Makes me do the things I do Walking, talking, no use crying Living, loving, no use dying There was a time I thought I knew it all I could walk before I crawled Jesus crushed my heart of stone Gave me love I had never known Don't need no, don't want no
