

# Don't Wait

Bridget Kelly

Every hand needs a holder  
We young but only getting older  
It's too late to press rewind  
So don't look back and we'll fine

You were made for me  
Baby, you can't deny this chemistry  
I see it your eyes  
And honestly  
If you don't live in the moment  
You'll miss it when it's gone

So don't wait too long  
Time waits for no one  
It leaves you alone  
If you find your someone  
Then don't let em go  
Cuz if you let me  
I'll give you all you need  
I don't care if you get it wrong  
But don't wait too long  
Oh...

Nowadays people never satisfied  
Too many options keep them occupied  
I need the one that's gonna change my life  
That kinda love that keeps you up at night

You were made for me  
Baby, you can't deny this chemistry  
I see it your eyes  
And honestly  
If you don't live in the moment  
You'll miss it when it's gone

So don't wait too long  
Time waits for no one  
It leaves you alone  
If you find your someone  
Then don't let em go  
Cuz if you let me  
I'll give you all you need  
I don't care if you get it wrong  
But don't wait too long  
Oh...

Baby, just hold me close  
Just wanna let you know  
You shouldn't wait no more  
So don't

So don't wait too long  
Time waits for no one  
It leaves you alone  
If you find your someone  
Then don't let em go  
Cuz if you let me

I'll give you all you need  
I don't care if you get it wrong  
But don't wait too long  
Oh...
