

# Harbor

Britnee Kellogg

Don't ask me how I knew the answer like the wind just blew in  
That I should be with you, only you, I finally knew, yeah  
You are the one who gave me shelter, called me when I faltered  
I'm so free in your arms

And I know we can go so much farther  
'Cause this love that we share is our harbor  
All the storms will just make us stronger  
And we'll always return to our love  
It's our harbor  
It's our harbor

Guess what I'm thinking now  
I know you can, you've got me figured out  
Now that I've let you in, tell me where I end and you begin  
You are my open ocean, still you are my destination  
I'm so free in your arms

And I know we can go so much farther  
'Cause this love that we share is our harbor  
All the storms will just make us stronger  
And we'll always return to our love  
It's our harbor  
It's our harbor

We will rock on the waves  
Our course, it will change  
We will rise and we'll fall  
But we'll get through it all

And I know we can go so much farther  
'Cause this love that we share is our harbor  
All the storms will just make us stronger  
And we'll always return to our love

And I know we can go so much farther  
'Cause this love that we share is our harbor  
All the storms will just make us stronger  
And we'll always return to our love
