

Keep You In The Dark

Britnee Kellogg

I see the way you're looking at me
Baby you don't have to say a thing
I already know what you're thinking
And the bottle of wine needs drinking
I know we have plans tonight
But plans change all the time
Baby it'd be all right if we just stayed home

I just wanna keep you in the dark
Draw the shades, don't even wanna see the stars
Feel my way around every single part of you
When the morning comes stay right where you are
I just wanna keep you in the dark
In the dark

I wanna feel your every breath
Feel your heart beating out of your chest
Make me remember the first time touching
And you know it's a rush
Wrap me in your arms and never turn the lights back on

I just wanna keep you in the dark
Draw the shades, don't even wanna see the stars
Feel my way around every single part of you
When the morning comes stay right where you are
I just wanna keep you in the dark
In the dark
I just wanna keep you in the dark
In the dark

Baby it'd be all right if we just stayed home
Wrap me in your arms and never turn the lights back on

I just wanna keep you in the dark
Draw the shades, don't even wanna see the stars
Feel my way around every single part of you
When the morning comes stay right where you are

I just wanna keep you in the dark
Draw the shades, don't even wanna see the stars
Feel my way around every single part of you
When the morning comes stay right where you are
I just wanna keep you in the dark
In the dark
I just wanna keep you in the dark
In the dark
