

Another Day

Brittany Howard

I believe in a world
Where we can go outside and
Be who we want and see who we like
And love each-other through this wild ride
And love each-other through this wild ride
We were born in a time to change the paradigm
Peace is the prize of our timeline
Yes, I know we can do it cause we must do it
I know we can do it (So, let's get to it)

I am in love when they tell me to hide
To fear my neighbor
To close my mind
I am having the time of my life
I am having the time of my life

When we come to it
When are we gonna do that?
When are we gonna do it?
Will you help me to it?

If we can get this shit together
Then what could we make?
If no power can hold it, no power can take it?
Free each-other for the first time?
Would we free each-other for the first time?

Will we come to a day after all is discovered
That peace is the place that we can't take each other?
I know we can do it cause we must do it
I know we can do it
(Come on prove it)

I am in love while the world is on fire
Can't feed the flames
Can't run and hide
I am having the time of my life
I am having the time of my life

When we come to it
When are we gonna do that?
When are we gonna do it?
Will you help me do it?
