

# Feel Love

Broadside

You make me feel love  
You make me feel love

I could almost catch a moment  
In the corner of your eyes  
Saw me drinking, still at war  
What kinda savior am I

You need an angel I'm not an angel  
I'm not a lover or a friend  
Just a passenger, that's all I've ever

Been so self-deprecating  
In a daze, 'til you came along  
So used to devastation  
It's complicated

But you make me feel love  
When I'm close to giving in  
You pull me back again  
Yeah, I can't get enough  
I'm drunk on your medicine  
No matter what state I'm in  
You make me feel

Before you, I was nothing just a fuck up alone  
In the silence with a headache and a chill in my bones  
I met the devil, told me to let go  
But now your voice is in my head just like an echo

But you make me feel love  
When I'm close to giving in  
You pull me back again  
Yeah, I can't get enough  
I'm drunk on your medicine  
No matter what state I'm in  
You make me feel

You need an angel  
I'm not an angel  
You need an angel  
I think you're my angel

You make me feel love  
When I'm close to giving in  
You pull me back again  
Yeah, I can't get enough  
I'm drunk on your medicine  
No matter what state I'm in  
You make me feel love

You make me feel
