

Lose Your Way

Broadside

You find yourself trapped in self doubt
Wondering if you'll come out alive
You'll find
Millions of people trying to dim you out
But baby you still shine
If you try
So much more inside your head
Overcome everything and everyone in your way

Draw the map and lose your way
The answers come from your mistakes
Don't let the failure keep you down
You've got to fall to figure out
That only you can change your mind and your life

You're wondering just how you will make it out
When everything just seems unfair
Oh no no no no you've got to let that go
The pressure to be the image you see
Stop living your life through a screen
You're supposed to feel incomplete
That's how they sell a dream

Can't you see the power to be
The master of your destiny
(Be the one to)

Draw the map and lose your way
The answers come from your mistakes
Don't let the failure keep you down
You've got to fall to figure out
That only you can change your mind and your life

Let the sun shine in the back of your mind
Where it rains all day and keeps you up at night
You've gotta believe in what you want
You've gotta put faith in who you are
Do you believe in your self worth
You've gotta make this work

Draw the map and lose your way
The answers come from your mistakes
Don't let the failure keep you down
You've got to fall to figure out
That only you can change your mind and your life
Your mind
Your life
