

Come

Broken Iris

I need you to come, I want you to come
I need you to comfort me, my dear
I want you to come, I need you near
I wish you would whisper in my ear

[?]

And to despise me
Tonight you'll be with me
In the morning you may leave

I need you to come, I want you to come
I need you to comfort me, my dear
I want you to come, I need you near
I wish you would whisper in my ear
That everything is fine
Even if it's a lie
At least you comfort me my dear
So just sit tight, soothe my needs
Let me bring you to your knee

I wonder why I waited for you
To test and see why our love is true
There's not a harder thing a man can do
Than pretend he's not in love with you

I wanted to come, I need you to come
I wanted to come with you, my dear
I wanted to come, I need you to come
I wanted to comfort you, my dear

So go ahead and leave, go ahead and leave
I need you to leave me here, my dear
I need you to see, I need to be free
I need you to leave me here in pieces
Leave me here in pieces
Leave me here in pieces
Leave me here in pieces
