

Off The Ground

Brooke Eden

I got two points of view
Life before and after you
Came around
Turned me upside down
Love stoned, I'll never touch
This kind of buzz don't sober up
Ain't no gravity
When you're next to me

I love the way you got me levitating
Losing my mind
It's outta body, baby
No one gets me this high
The day we met you had my future
Taking all of my time
Take me up to the clouds
Love me right off the ground

(Ooh, oh-oh, oh-oh
Love me right off the ground)

I feel bad, folks down there
They don't get to share the air
That I do way
Up here with you
You got me outta this world
I'm talking Jupiter, girl
Closest I've ever been
To heaven, baby

I love the way you got me levitating
Losing my mind
It's outta body, baby
No one gets me this high
The day we met you had my future
Taking all of my time
Take me up to the clouds
Love me right off the ground

Love me, love me right
Love me, love me right
Love me, love me
Love me right off the ground

I love the way you got me levitating
Losing my mind
It's outta body, baby
No one gets me this high
The day we met you had my future (you got my future, baby)
Taking all of my time
Take me up to the clouds
Love me right off the ground

I love the way you got me levitating
Losing my mind
It's outta body, baby
No one gets me this high

The day we met you had my future
Taking all of my time
Take me up to the clouds
Love me right off the ground

Love me, love me right
Love me, love me right
Love me, love me
Love me right off the ground

I love it, baby
I love it, baby
Nobody gets me this high
