

Into the Trees

Brooke White

Tell me a secret nobody knows
Good conversation and the Rolling Stones
We'll chase the sunset on the open road
Don't need a reason if you want to go
We'll leave tonight
Young hearts, headlights
We'll get there fast so we can take it slow
Let's build a fire, watch the fire grow
We'll stick together and

Let our love grow wild and free
C'mon babe, get lost with me
Just a couple of kids by the creek
We can carve our name into the trees
Ain't nobody else in sight
Just you and me and the fireflies
A couple of kids meant to be
Just follow me into the trees

We'll keep on driving till the truck breaks down
Then rent a cabin in a mountain town
Wrap me up in a summer breeze
I'll be your songbird, yeah, your melody
High tide, low docks
Hold hands, skip rocks
Let's take it slow so we don't burn too fast
We got a spark and it was made to last
We'll stick together and

Let our love grow wild and free
C'mon babe get lost with me
Just a couple of kids by the creek
We can carve our name into the trees
Ain't nobody else in sight
Just you and me and the fireflies
A couple of kids meant to be
Just follow me into the trees

Walk with me
Hold my hand
Let's stay a while
Go with the wind
Into the trees
We'll disappear into the dark
We'll find our way under the stars
Into the trees
Kiss me now I won't forget
The way we felt the day we went
Into the trees
Let's make a pact a memory
A promise we'll always keep

Let our love grow wild and free
C'mon babe get lost with me
Just a couple of kids by the creek
We can carve our name into the trees
Ain't nobody else in sight

Just you and me and the fireflies
A couple of kids meant to be
Just follow me into the trees
