

All Night

Brotherhood of Man

All night holding you tight
All night kissing you right
All night loving with you
All night seeing it through

Baby, baby save me, save me
I'm so lonely for you
Baby, baby hold me, save me
I need loving from you

All night holding you tight
All night kissing you right
All night loving with you
All night seeing it through

Honey, baby, drive me crazy
I'm so lonely for you
Take me, make me, don't forsake me
I've been waiting for you

All night holding you tight
All night kissing you right
All night loving with you
All night seeing it through

All night holding you tight
All night kissing you right
All night loving with you
All night seeing it through

All night holding you tight
All night kissing you right
All night loving with you
All night seeing it through ...
