

There's A Mountain

Brotherhood of Man

Don't say that I didn't let you know that before too long
Someone would let you down
So your cross is too hard to bear
Come with me and I'll take you where

There's a mountain, high at the top of the mountain
You can bring water, you can wash your sins away
And there's no darkness, high at the top of the mountain
Just a good foundation, for truth and love

If he can't find the strength
To hold your head up high
Every step there's a strain on your achin' heart
Of trouble, you've had your share
Come with me and I'll take you where

There's a mountain, high at the top of the mountain
You can bring water, you can wash your sins away
And there's no darkness, high at the top of the mountain
Just a good foundation, for truth and love

Ooooooh-oooh-oooh
Come on child
Don't blow your mind
The foolish child
Has caused reason has lost all the value you had
We'll build it up somehow
Come with me and I'll take you now

There's a mountain, high at the top of the mountain
You can bring water, you can wash your sins away
And there's no darkness, high at the top of the mountain
Just a good foundation, for truth and love

There's a mountain, high at the top of the mountain
You can bring water, you can wash your sins away
And there's no darkness, high at the top of the mountain
Just a good foundation, for truth and love
