

Life's full of pain, pain from your birth
Pain to the day, that they put you in the dirt
You can fell pain from gettin' up and puttin' in the work
Or pain for regrettin' all the days that you focused on the worst
Pain, pain from your birth
Pain till the day that they drive you in a hearse
You can fell pain from gettin' up and puttin' in the work

I been thru so much in life there ain't much these mana tellin' me
Why you call me family you feeling like my enemy
Everybody wanna try fuckin' with' my energy
Brush that won't stop till I built a legacy
I see roads ahead which way do I turn now
Man kept it movin' and look how it turned out
They got no stamina didn't make it through the first round
Ya burnt out, I can't see them man unless I turn' round
If u can't see the light you better find a way
We all got problems gotta face them you can't hide away
If u can't see the light you better find a way
We all got problems gotta face them you can't hide away
I hate the world but I'm lovin' life
Skippin' on the rhythm I be hittin' it up just in time
If you feelin' this show me another sign
Big up tsuki all these man are bookey they ain't touchin' I

Life's full of pain, pain from your birth
Pain till the day that they drive you in a hearse
You can feel pain from gettin' up and puttin' in the work
Or pain for regrettin' all the days that u focused on the worst
Pain, pain from ya birth
Pain till the day that they drive you in a hearse
You can feel pain from gettin' up and puttin' in the work
Or pain for regrettin' all the days that you focused on the worst

I focus on the better in my life
Focus on my son and focus on my future wife
Its not easy to focus sometimes your focus will be blind
But its just like a muscle
If you practice you will get there in good time
I'm workin' on my body soul and mind
Everything must be just how I want it it's my time
I feel it in my bones, I feel it when I look it to your eyes
Cause' u feel it when u look into my eyes

Why do you look surprised
So many times them man doubted me fine
I honestly don't mind
Roll the fuckin' dice
Why you sittin' on the side
Life is just a game it's just a ride
Whats the meaning of it all
Would do you expect a little boy
To stay on the floor if u seen him fall
Would expect a little baby
To give up when time after time he couldn't walk
What I'm sayin' is inside you there is more
They say that when it rains it fuckin' pours

But I'm dancin' in the thunderstorm I'm not stayin' indoors
I'm climbin' to the top, got me diggin' in my claws
I been doin' this for years I've literally seen it all
I've literally been in the lowest place a person goes
I didn't think there was a way back and it burned my soul
But you can win, you gotta learn to grow
You gotta look at yourself you gotta serve your role
Find what gives u joy n find a hobby
Partyin' it's cool but your poisoining your body
You're playin' for your mind, drugs play a major role
Only so much u can take till it takes it's tole
Now I know that I got bad days to come
But I'm getting stronger now so I can be there for my son
I never thought I'd ever be here when I was young
So I'm makin' every day count
And yeah I'm havin' fun cause there's pain

Life's full of pain, pain from your birth
Pain till the day that they drive you in a hearse
You can feel pain from gettin' up and puttin' in the work
Or pain for regrettin' all the days that you focused on the worst
Pain, pain from ya birth
Pain till the day that they drive you in a hearse
You can feel pain from gettin' up and puttin' in the work
Or pain for regrettin' all the days that you focused on the worst
