

# See The Same Way

Bruce Hornsby

There was a little girl picked up a doll  
Oh, so white as snow  
Said this is me as I really am  
Same little girl picked up a doll  
Looked just like her  
And threw it away in the garbage, the garbage can

One man in a courtroom with a grim-faced stare  
A sea of armchair experts judging what's said  
One man saw another man, oh, that could've been him  
One man and a woman saw nothing but red, red, red

You're looking at a picture  
I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference  
Find out what's in the way  
Open our eyes, see the same  
See the same way

One man saw a healer doing such good, good things  
One man saw a sinner by the Holy Sea  
Well Jesus and the Pharisees didn't see eye to eye  
But the man on the shore saw so clearly

You're looking at a picture  
I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference  
Find out what's in the way  
Open our eyes, see the same  
See the same way

I want to be at the meeting  
Well, I want to be in that number  
When we all see, see the same  
See the same way

One man saw a million men  
Standing in peaceful grace  
One man saw nobody missing work  
Telling lots of bad jokes  
Might just make you feel good  
But you never know who you  
Who you hurt with your words

You're looking at a picture  
I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference  
Find out what's in the way  
Open our eyes, see the same  
See the same way, hey now

There was a man playing G.I. Joe  
Way back there in the woods  
In training for the coming of the promised war

Seeing all conspiracy  
Needs somebody to blame  
If only he could open up  
Love a little more, hmm

You're looking at a picture  
I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference  
Find out what's in the way  
Open our eyes, see the same  
See the same way, hey now

I want to be at the meeting  
Well, I want to be in that number  
When we all see, see the same  
See the same way
