

# I'll Stand By You

Bruce Springsteen

You wake me in the night, to your tears fallin' down  
Come, let me dry them for you  
I wish I could tell a story, chase away all those ghosts  
You got inside of you

A story of heroes who fight on at any cost  
Of a kingdom of love to be won or lost  
We'll fight here together 'til victory is won  
Come take my hand 'til mornin' comes  
Just close your eyes

I'll stand by you always  
Always, always  
I'll stand by you always  
Always, always

I know here in the dark, tomorrow can seem  
So very far away  
Here the ghosts and the goblins can rise from your dreams  
To steal your heart away

Together we'll chase those thieves that won't leave you alone  
Out from under the bed, out from over our home  
And when the light comes, we'll laugh, my love  
At the things that the night had us so frightened of  
And until then

I'll stand by you always  
Always, always  
I'll stand by you always  
Always, always

I'll stand by you always, ooh  
I'll stand by you always

Now I know it can feel like you're slippin' away  
At night you'll get lost in that deep dark place  
We'll let the night come and do what it may  
Together we'll find courage, we'll find faith  
Until you wake

I'll stand by you always  
Always, always  
I'll stand by you always  
Always, always

I'll stand by you always, ooh  
I'll stand by you always

I'll stand by you always  
Always, always  
I'll stand by you always  
Always
