

# What Love Can Do

Bruce Springsteen

**Em**                    **D**                    **G**                    **C**  
1. There's a pillar in the temple where I carved your name  
**Em**                    **D**                    **Em**  
There's a soul sitting sad and blue  
**Em**                    **D**                    **G**                    **C**  
Now the remedies you've taken are all in vain  
**Am**                    **G**                    **C**  
Let me show you what love can do  
**Am**                    **G**                    **C**  
Let me show you what love can do

**Em**                    **D**                    **Em**                    **G**  
R: Darling I can't stop the rain  
**Em**                    **D**                    **G**  
Or turn your black sky blue  
**Am**                    **G**                    **C**  
Well let me show you what love can do  
**Am**                    **G**                    **C**  
Let me show you what love can do

2. Well now our truth lay shattered, we stood at world's end  
There's a dead sun rose in view  
As if any of this matters, a kiss my friend  
Let me show you what love can do  
Let me show you what love can do

R: Darling we can't stop this train  
When it comes crashing through  
But let me show you what love can do  
Let me show you what love can do

**Em**                    **D**                    **Em**                    **G**  
On the bench you lie all is nails and rust  
**Em**                    **D**                    **Em**                    **G**  
And the love you've given's turned ashes and dust  
**Em**                    **D**                    **Em**                    **G**  
When the hope you've gathered's drifted to the wind  
**Em**                    **D**                    **Em**  
It's you and I now, friend (you and I now, friend)  
**D**                    **Em**  
You and I now, friend

**Em**                    **D**                    **G**                    **C**  
Here our memory lay corrupted and our city lay dry  
**Em**                    **D**                    **Em**  
Let me make this vow to you  
**Em**                    **D**                    **G**                    **C**  
Here where it's blood for blood and an eye for an eye  
**Am**                    **G**                    **C**  
Let me show you what love can do  
**Am**                    **G**                    **C**  
Let me show you what love can do

**Em**                    **D**                    **Em**                    **G**  
Here we bear the mark of Cain  
**Em**                    **D**                    **G**  
But let the light shine through

**Am**                      **G**                      **C**  
Let me show you what love can do  
Let me show you what love can do  
Let me show you what love can do  
Let me show you what love can do
