

Attention

Bryce Savage

Addiction
Affliction
Obsessed with position
The only prescription
Is lots of opinions
So please love me
Don't leave me
Just need me
Tell me how you always wished you could be me
Let your cameras and filters deceive me
Shoot me up I'll overdose on the feeling

Just take my soul
I don't want it anymore
I just want to be known
I can't stand to be ignored
So just take my soul

We're all starving for a second of attention
An undying need obsession for attention
All our lives are just a projection for attention
Cause we're all starving for a second of attention

Give me attention
I need attention
Give me attention
I need attention

Just take my soul
I don't want it anymore
I just want to be known
I can't stand to be ignored
So just take my soul

We're all starving for a second of attention
An undying need obsession for attention
All our lives are just a projection for attention
Cause we're all starving for a second of attention

Give me attention
I need attention
Give me attention
I need attention
