

Burn Out The Stars

Bryce Savage

I'm convinced that no matter where we end up - in space, in time...

In this life or the next hundred lives we'll always find each other

I wanna burn out the stars with you
Tear it all apart with you
It's not a piece of my heart with you
It's every damn part with you
And I don't wanna wake up
If it's not your face, love
Galaxies and space can't
Keep me from your taste, love
Burn out the stars with you
I want every part of you

She's like looking at the sunset
A perfect trace of her silhouette
She's like trying to catch my breath
My heart raced when we first met
A perfect smile and her eyes too
They sparkle brighter than the stars do
If you're ever lost I will find you
I'll always find you

I wanna burn out the stars with you
Tear it all apart with you
It's not a piece of my heart with you
It's every damn part with you
And I don't wanna wake up
If it's not your face, love
Galaxies and space can't
Keep me from your taste, love
Burn out the stars with you
I want every part of you
