

Mirage

Brymo

Let us get high
Before we'd fall from the sky
Maybe we can grow wings
And maybe we won't
Tomorrow is still far
Today will be enough
So let us get high
Before fall from the sky

On the highway of life
I see reflections from a distance
I see them walking on water
The closer I gets
The faster it fade away
The mirage is away
Everything you thought you knew today
When the day face they fade away

Let us get high
We still have to night
Yesterday for the memories
And everything is alright
Take a break from reality
And take a fly to miles
So let us get high
Before fall from the sky

No way
The mirage is away
Everything you thought you knew today
When the day face they fade away

On the road to the master
You are your own savior
If you need someone to care
I'll do you that favour
Oh oh oh...
