Kawaru koto nai ai o chikaou

I used to look for a love that never changed

As soon as I saw her face, I could feel it was fate
No matter what they say, they're just jealous of us
Even if it's hard every day, we've got to hold on

Wasurenaide, boku no ai de

Last piece to my puzzle
Yeah, you complete me
I'd do anything for you
You're the girl of my dreams
Don't want anybody else
Only you beside me
Through my high and my low
I just want you to know
Across the ocean I'd row
If that's the only way to see you
I'd do it for sure
We'd be the best combo
Hey, I love you to death
Girl, I just want you to know
That I'd do anything for you
To you, my life I bestow
