All for you

Since when the moon
And Earth this close to each other?
You shine just by existing
Can I stay by your side?

You are my Earth
To you I am just a moon
Your little star that brightens your heart
You are my Earth
And all I see is you
I am just gazing at you like this

Everyone says I am beautiful but
My oceans are all pitch-black
A star where flowers bloom and the sky is deep-blue
The one that's truly beautiful is you

I wonder all of a sudden, are you also looking at me right now?
Even my painful scars, wouldn't everything be found out by you?
I will orbit you
I will stay by your side
I will become your light
All for you

I didn't even have a name
Until the moment I met you
You gave me love and
Now became my reason

You are my Earth
To you I am just a moon
Your little star that brightens your heart
You are my Earth
And all I see is you
I am just gazing at you like this

In the crescent moon night
Even after closing my eyes you rush in with your blue
In the full moon night
Would it be okay to hold you inside my eyes after opening them?

I wonder all of a sudden, are you also looking at me right now?
Even my painful scars, wouldn't everything be found out by you?
I will orbit you
I will stay by your side

I will become your light
All for you

Even in the light of day
Even in the dark of night
You stay by my side
Even when I am sad
Even when I am hurt
You simply shine on me

Rather than saying anything
Rather than thanking you
I will stay by your side
In the pitch-dark night
I will protect that place next to you
More brightly

I wonder all of a sudden, do you really know yourself?
Do you know how pretty you are?
I will orbit you
I will stay by your side
I will become your light
All for you
