

# Blow The Spot

## Bubbles

It's getting hot we blow the spot!

Party's getting started, lights are getting low  
Something is about to explode  
Souls are shaken  
And hearts are taken around you, yeah, yeah

Come a little closer and moving to the vibe  
Show me that you're up for the ride  
The bass is pumping  
And people jumping around you, yeah, yeah

So you got what it takes  
Can you handle the case?  
Then everything will be alright  
Everybody's going  
Down! Down! Down!

Bouncing getting it on to the music  
We blow the spot  
Bouncing, making it right while we crusing  
It's getting hot we blow the spot!

Cranking up the level, speeding down the lane  
Everybody's going insane  
All the girls are flying  
And the boys are trying around you, yeah, eh

Making our connections, talking through the eyes  
Knowing that tonight is the night  
And it feels so good  
Like I know it would around you, ooh ooh ooh

So you got what it takes  
Can you handle the case?  
Then everything will be alright  
Everybody's going  
Down! Down! Down!

Bouncing, getting it on to the music  
We blow the spot  
Bouncing, making it right while we crusing  
It's getting hot we blow the spot!

Swing it, shake it  
Sliding to the left  
We're moving and kicking  
Sliding to the right, come on

So you got what it takes  
Can you handle the case?  
Then everything will be alright  
Down! Down! Down!

Bouncing, getting it on to the music (to the music)  
We blow the spot  
Bouncing, making it right while we crusing

It's getting hot we blow the spot!

Bouncing, getting it on to the music  
We blow the spot (we blow the spot)  
BUBBLES making it right while we crusing  
It's getting hot we blow the spot!
