

Onset

Buckcherry

The counter culture left us with some redness in the eyes
Faded jeans and politics and shooters in the sky
Diagnosed a menace and I'm broken in the mind
The doctor said the Ritalin would surely work out fine
You're always there, you're always with me
You always fill me up (It's scary out there)
You're always fair, you always miss me,
You always bring me love

Flower rich emotion and I can't control my mind
A drop of anti-matter and I'll blow up all mankind
Maybe I am jaded, or I'm mean, or I am blind
Live in fear of God is real there's nothing left to hide
You're always there, you're always with me
You always fill me up (It's scary out there)
You're always fair, you always miss me
You always bring me love

It's not the same living on the edge
I'm not the same so go ahead and ride
Ride, ride, ride
You're always there, you're always with me
You always fill me up (It's scary out there)
You're always fair, you always miss me
You always bring me love
Never be scared
