

This and That

Buckcherry

The freaks come out on a Friday night
And that's when sugar gets made
People wanna go where the action's at
Let your wild side come and play

Breakin' the rules, maybe start a fight
I got a buddy in the backseat, grazed
I gotta maditude, I got a pretty life
You can see it written on my face

We get off on a fantasy
Then we make it real, let it all go free
Make a list and you make it thin
And find your bliss

You can do this, you can do that
I don't play games, I don't talk that smack
And I've been told to take the higher road
When I hunt you down, I won't be messin' around
I can do this, I can do that
Don't take no shit, don't watch my back
I ain't cold, but you better know
When I come, I won't be messin' around

Livin' on a roll, gonna stay 'til this day
See a lot of people lose control
Gettin' stoned on the rock 'n' roll
I'll pick you up when you're way down low

So hot when you're filled with steam
You gotta let it go, then you're livin' dreams
What the hell are you gonna miss?
You gotta take a praise

You can do this, you can do that
I don't play games, I don't talk that smack
And I've been told to take the higher road
When I hunt you down, I won't be messin' around
I can do this, I can do that
Don't take no shit, don't watch my back
I ain't cold, but you better know
When I come, I won't be messin' around

I am built to last
Don't you come too fast
Better tell your mommy you're here
And you might not make it home

The freaks come out on a Friday night
And that's when sugar gets made
People wanna go where the action's at
Let your wild side come and play

You can do this, you can do that
I don't play games, I don't talk that smack
And I've been told to take the higher road
When I hunt you down, I won't be messin' around

I can do this, I can do that
Don't take no shit, don't watch my back
I ain't cold, but you better know
When I come, I won't be messin' around

This! That!
This! That!
This! That!
This! That!
