

Fire And Gas

Buddy Brown

One more kiss then I'm dropping you off tonight
I never prayed to run out of gas but this time I might
I told everyone that we take it easy 'cause they know my past
They said if you and me ever got together we'd be fire and gas

I love the way you wait for me out front when I pull in your drive

And I love the way you let me open the door and help you inside
This truck never smelled so good till you brought that perfume
in here, I sure hope it lasts
They said if you and me ever got together we'd be fire and gas

Fire to make it warm up, gas to make it run
The 2 of us are burning like the surface of the sun
And I'm rough around the edges, you're good at acting sweet
And no one's got a clue just how wild you are with me
So light it up, light it up, light it up now baby
Light it up, light it up, light it up now baby
Light it up, light it up, light it up now baby, let's run

We're double trouble in a small southern town, they're gonna find us out quick
It ain't that hard to read that look on your face when they ask
where you've been
But baby you and me are too much alike, how could we ever make it last
They said if you and me ever got together we'd be fire and gas

Fire to make it warm up, gas to make it run
The 2 of us are burning like the surface of the sun
And I'm rough around the edge, you're good at acting sweet
And no one's got a clue just how wild you are with me
So light it up, light it up, light it up now baby
Light it up, light it up, light it up now baby
Light it up, light it up, light it up now baby, let's run
Light it up, light it up, light it up now baby
Light it up, light it up, light it up now baby
Light it up, light it up, light it up now baby, let's run
