

## We'll See

Buffalo Springfield

Stills

Fall on by\*, you know I'd really like to talk to you  
By and by we might just happen to find out we two  
Have got more than a little in common  
It's a bore\* just to sit a while and "we'll see!"  
The following verse is only present in the acoustic demo version (track 9, CD1):

Then we might discover differences that make us say  
"It's not riding on\* with any game you want to play"  
Baby, you're caught in the middle of a terrible brawl  
Better sit a while, and we'll see.  
Queen of Hearts, go ahead  
Play your parts instead of the real thing  
Which will never come, use your head

Baby please, I just don't get the point, because you see  
I don't need anymore from you than you'd expect from me  
You just love with a drop of more honesty  
Rise above saying, "sit a while, and we'll see."  
Queen of Hearts, go ahead  
Play your parts instead of the real thing  
Which will never come, use your head  
Ask me why the next time when I can't recall your name  
You'll still cry and yet my answer will remain the same  
You just love with a drop of more honesty  
Rise above saying, "sit a while, and we'll see."  
"Sit a while, and we'll see."  
"Sit a while, and we'll see."
