

# Shipwrecked

Bugoy Drilon

I hate being stuck here on the inside  
Trying to distract me from the fact that  
I'm a million miles from you

Before, you used to come in like the high tide  
But now, I only see you on the Facetime, yeah  
Like what am I supposed to do?

I wish we could get up and just sail away  
Find ourselves a paradise that we can stay in  
Cause baby, you're all I need  
We can leave the city and the stress behind  
I don't need nobody you're my only vibe  
When I'm with you I'm free

That's where I wanna be

Shipwrecked on an island with you  
Nothing else around us just the stars and the view, yeah  
You complete me in every way  
Sea breeze and the sun on your skin  
I don't wanna be without you ever again, yeah  
Please, come and take me away  
On a permanent holiday

I've been feeling kinda locked down  
Every day just like the last one, yeah  
A million hours consumed

You been far away, been kinda distant  
We can't find a way to coexist and, yeah  
It's driving me through the roof

I wish we could get up and just disappear  
Someplace where the water and the air is clear  
Cause baby, you're all I see, oh...  
We can build a life we don't need nobody else  
I swear my only vice is I can't live with myself, yeah  
If you're not right next to me

There's only one place for me

Shipwrecked on an island with you  
Dancing on the sand under the light of the moon, yeah  
You complete me in every way  
Palm trees and the wind in your hair  
We can spend our days not a doubt or a care, yeah  
Please, come and take me away  
On a permanent holiday  
On a permanent holiday  
Take me away  
Please, come and take me away  
On a permanent holiday  
Take me away  
Please, come and take me away  
On a permanent holiday
