Hold Them Close

I know I shouldn't want Any more than what I've got When I think about what's missing Seems like a lot But then I looked into their eyes And see my children smile I realize what I've been given I have more than I have not

Where I am today Didn't happen by mistake You're brought me here Where I'm supposed to be Time will sleep away But God don't let me waste A second of today Not a second, one second

I'm gonna hold them close Every memory, every little bit And I won't let go Everything I need is right in front of me You've given me what matters the most So let me hold them close

I feel the grace of God When my wife is by my side A treasure I could never earn No matter how hard I try I take a look at the past That brought us where we are All I see is your faithfulness That's carried us this far

Time will sleep away I'm so thankful for today So God don't let me waste One second, not a second

I'm gonna hold them close Every memory, every little bit And I won't let go Everything I need is right in front of me You've given me what matters the most So let me hold them close

So let me hold them close

Everything that you have done Everything you're given us Every good from you Gonna hold them close

Everything that you have done Everything you're given us Every gift from you Gonna hold them close

Building 429

I'm gonna hold them close Every memory, every little bit And I won't let go Everything I need is right in front of me You've given me what matters the most So let me hold them close Let me hold them close
