

## Understood

## Built to Spill

How can I hear, how can I see  
When no one really knows how it's gonna be?  
You read it in a book, you hope it isn't true  
And the next thing you know, it's happening to you

It's been a long time since we took a trip  
To the bottom of a canyon in a rocket ship  
Nothing's resonating in my mind  
So I'm doing my best to be unrefined

You can always choose, but you don't  
And you could be amused, but you won't  
There's no way to figure it out  
Life's just understood

But really I don't know  
But really I don't know  
But really I don't know

The deaf hear, the blind see  
Just different things than you and me  
The deaf can hear, the blind can see  
That's what I've been told and that's what I believe

But really I don't know  
But really I don't know  
But really I don't know

You can always choose, but you don't  
And you could be amused, but you won't  
There's no way to figure this out  
Life's just understood

It's been a long way, since the start of it  
And part of the problem is... you're such a part of it  
Seems like whatever we do is null  
Why can't we ever just be left alone?

The blind see, the deaf hear  
Exactly what is not clear  
The blind can see and the deaf can hear  
Finding out what is my greatest fear

You wanna move around and you wanna stay still  
You wanna have a life, but not too real  
Don't know what it means, but I know what it's like  
To be floating down the canyon in a rocket bike

But really I don't know  
But really I don't know  
But really I don't know
