

# All This Noise

**Bully**

Take some time to understand what empathy could do  
We would all be better off all of us, yes even you  
'Cause most of us weren't meant to fight the way we end up to  
But the media tries to control what we say, think, and do  
If we don't give them all the power that they want from you  
Maybe we could all learn to have an authentic point of view

But I'm tired  
Of waiting  
For change and debating

I can't handle all this noise  
Save us from what it destroys  
There's no glory to be found  
America's been burning down

Jesus won't save the polar bears or halt the melting ice  
But he'll give you an excuse to shame and take our bodies right  
s  
There's an AR-15 in your house it's got one job to do  
It's to quickly kill as many things that you want it to  
But god forbid we take action to keep our children safe  
As our ego stands in center stage another life it takes

And I'm tired  
Of waiting  
For change and debating

I can't handle all this noise  
My body is not your choice  
There's no glory to be found  
America's been burning down

And I'm tired of waiting  
This pain is too draining  
I'm tired of waiting for hope and for change and  
I'm sick of extinction each time that we blink and  
I won't let a man choose my own body's plan  
I'm tired of waiting for change and debating

What else is there to do  
When you can't escape the news?
