Meat

Bumblefoot

I've got somethin' in my eye – I don't know what is is
I thought it might be a sty – 'cause all I see are pigs
High-lives rolling in the mud while all I do is try
To save my soul a better seat in the empty sky

Save me from myself
From everyone else pullin' me down the drain
We are nothing – we are meat in the dying game
Save me from my destiny
The weak link in the chain
We are nothing – we are meat – we are all the same

We are nothing – we are meat
Out for #1
In the grinder, in the hole
Running from the gun

Save me from myself
From everyone else pullin' me down the drain
We are nothing – we are meat in the dying game
Save me from my destiny
The weak link in the chain
We are nothing – we are meat – we are all the same

Save me from myself
From everyone else pullin' me down the drain
We are nothing – we are meat in the dying game
Save me from my destiny
The weak link in the chain
We are nothing – we are meat – we are all the same

I'll be looking down on you if I get that high
Smiling at the frown on you from the empty sky
