

I just got a new medication
After years of hibernation
I can walk outside for the first time
And let the sunshine touch my head

Never went an hour without
Mutilating from the inside out
Now everything's fine for the first time
I feelin' like I'm born again

I try but can't explain it - I say too much
I feel so liberated - feels like love
It's so nice to be normal - to be normal for a change

I used to stare up at the sky
And watch the little worm in my eye
But now all I wanna do is look at you
And fill your darkest room with light

I try but can't explain it - I say too much
I feel so liberated - feels like love
It's so nice to be normal - to be normal for a change.
It's so nice to be normal - but it still feels kinda
strange.

The noise has left my head
The voice inside is dead
Now I don't hear a sound.
Never knew silence could ever be so loud.

I try but can't explain it - I say too much
I feel so liberated - feels like love
It's so nice to be normal - to be normal for a change.
It's so nice to be normal - to be normal
It's so nice to be normal - but it still feels kinda
strange.
