

# Unchained

## Burden Of Grief

Wake up - don't stop to think  
Burn down the walls of the authority  
In fear - we are no longer still  
I speak more truth than you wanna hear

Let's break these chains to show the world our fight  
Let's break these chains, so we won't suffer in pain  
Just close your eyes and hold your fist up high  
Refuse to be a part of this fucking lie

Insanity in our lives  
Depressions all along  
Unchain me, heal me, save me  
Let justice prevail and free me  
Unchain me, heal me. and release me

Can't tear - all my dreams apart  
Lust for control is everything you want,  
No sense - for humanity  
I've seen your wounds that you can't hide away

Let's break these chains to show the world our fight  
Let's break these chains, so we won't suffer in pain  
Just close your eyes and hold your fist up high  
Refuse to be a part of this fucking lie

I'm flying away, I spread my wings up high  
The oceans of fear, I'm leaving behind  
I don't look back and follow the sky  
I am a free man, I don't have to hide myself
