

## Dynasty Without A Future

### Burden Of Life

Staring on my riven self devoided  
I realize I'm still a slave  
Louring on this shattered state  
I let the sun blind my eyes once again

And I never ask why  
Because I already know the answer

Before you take one last breath  
Another breath of fresh air  
You know your strength has left you  
Was it really worth the share

But something's missing where's your dignity  
I find new chains every time I bleed  
They rip my skin defile my flesh  
Almost as your feeble embrace  
The border is the bone  
I'm abandoned, afforded by the sun's effort to give me warmth  
But soon I realize  
That light has never shone

Before you take one last breath  
Another breath of fresh air  
You know your strength has left you  
Was it really worth the share  
Now listen my child no one escapes  
Not even well-off maggots like you  
We to the same diseases  
Now tell me what's your share
