

# Eclipse

Buried In Verona

Now we're climbing out of the hole

Feeling like I'm sick  
I'm splitting down the seams  
Don't worry everything will be fine  
One more time please we're already dead  
Already dead

They say piece by piece I'm not a puzzle  
Come alive with some lines no lies I've had some trouble  
Sick of last place and the hiding is over  
I'm tired of the tide always taking us nowhere.  
Yeah

Undertow sweep me away  
Take me under don't let me breathe  
Sink my heart into the ocean  
While you're all above me

Blaming everyone  
Our bindings loosen up  
The friendships come undone  
Ever since this begun there's been no where to run  
I just need you to see the big picture in me

Over and over and over again  
I'm lost and I'm static  
Can't find where to begin  
The pages of the book  
Need to be written in  
I'll try till I'm broke  
Till there's nothing to give  
Over and over and over again  
The times don't change it's the same fucking thing  
It's scratching at a wound and it's wearing me thin  
I've never cried wolf  
But this shit needs to end  
Stuck so long it feels like forever
