

## Black Star

## Burning Point

music by P.Ahonen, lyrics by P.Ahonen & J.Kyro

Back alleys and secret doorways  
you always try to find  
passages to the other worlds  
but you're missing all the warning signs

Countless days of fighting  
the quest for the Holy Grail  
but the mysteries of a man prevail,  
you just leave blood on your trails

Haunted by the past  
memories will last  
through your life time

Revealing all the pain  
your mind's gone insane  
but it's not an excuse for your acts

Black Star  
shining over you  
Black Star  
you are always twisting the truth  
Black Star  
is shining over you  
Black Star  
but it's not an excuse for your acts

You'll never see a teardrop  
falling down my face  
but before you tear my heart out  
I hide in a secret place

In the misty morning, just before the dawn  
I hear it calling, calling me...  
Out in the darkness, into the light  
it's finally over the endless night
