

# The Age

## Bury Tomorrow

How can you feel content, with this world so cold? Just forgotten souls, we are on our own  
The sin of sins is to scorch the earth 'till there is nothing left, there is nothing left

Blackhole, swallow us all. Reset the switch, return to old  
Blackhole, swallow us all. Reset the switch, return to old

Restart the age, ignite the fire, our time erased, is all that's left, in search of this  
Free from the pain, we can aspire, we cannot take this constant ache, can we return from this?

We've turned the sea from the land, arrogance of man  
Believing it's our given right, we're taking all that we can  
Bodies piled high to fuel the fires, creation of destruction that never tires

Blackhole, swallow us all, reset the switch, return to old

Blackhole, swallow us all, return the switch, return to old

Restart the age, ignite the fire, our time erased, is all that's left, in search of this  
Free from the pain, we can aspire, we cannot take this constant ache, can we return from this?

Take it back, take it back, take it all back, to the place, the time and the moment  
Can we make, can we make, can we make it right?  
Build it from the ground, and let us shine, our souls aligned, let us shine, our souls aligned

Restart the age, ignite the fire, our time erased, is all that's left, in search of this  
Free from the pain, we can aspire, we cannot take this constant ache, can we return?
